**Animal Origin Content Statement
for
Zytel® Nylon Resin**

Relative to the use of additives of animal origin in polymer products, Zytel® polyamide resin may contain a minor quantity of a component derived from bovine sources. As of January 2004, the supplier for that component has provided assurance that it is derived from raw material purchased from countries where the occurrence of BSE is relatively small.

Additionally, the raw material is subjected to rigorous processes of hydrolysis and distillation as well as hydrogenation for some of the products. The operating temperatures are over 450 °F which exceeds the processing condition criteria guidelines recommended to prevent transmission of BSE by the EU Scientific Steering Committee and other regulatory bodies.

This statement is based on our current level of knowledge and covers commercial and experimental resins as supplied by DuPont at the date of issue. Since conditions of use are outside DuPont's control, DuPont makes no warranties, express or implied, and assumes no liability in connection with any use of this information.
