Re: DEHP Content of Value Plastics Resins

Dear Valued Customer,

Value Plastics, Inc. is aware of the concern over health risks associated with Di(2-ethylhexyl) phthalate (DEHP) in plastic products. Of the more than 3,000 products manufactured and sold by Value Plastics, it is only those specifically consisting of PVC (polyvinyl chloride) that may contain DEHP. For Value Plastics, this currently represents those products specifically incorporating PVC tubing, either as a direct sale item or as part of an assembly. For more information specific to products you purchase please reference the chart below.

If the product(s) you purchase are made of the following resins they do **not** contain DEHP.
