## Value Plastics Releases 600 Series Large-Size Tube Fittings

Value Plastics announces availability of new 600 Series large-size tube-to-tube fittings.

600 Series fittings, available for use with tube IDs from 1/4" (6.25 mm) to 1" (25.5 mm), are designed for the most demanding applications involving silicone and C-Flex® tubing. 600 Series fittings also work well with Tygon® and vinyl tubing. Fourteen (14) configurations of straight unions, reducing unions, tees and Y's are available off the shelf in gamma-stable polypropylene and polycarbonate resins. The materials used comply with USP Class VI requirements for biocompatibility. The new design complements Value Plastics' existing line of 500 Series fittings for use with tubing sizes 1/4" (6.25 mm) and above.

Obtain a copy of the 4-color 2-page brochure by calling Inside Sales at Value Plastics at 970-267-5200 (toll-free in U.S.A. at 888-404-5837) or by completing an online request at [http://www.valueplastics.com/contact\\_us/index.asp](http://www.valueplastics.com/contact_us/index.asp)

Value Plastics makes and markets an innovative line of fluid management components designed specifically for flexible tubing. Value Plastics products find global application in demanding healthcare OEM, research and light industrial applications, and all are produced in its Northern Colorado facility. For further information, please contact Will Kiff Stone, Marketing Communications Manager, at 970-267-5221, or wills@valueplastics.com.
